

BAHAMAS

THE MISSION

Our main goal is to continue to aid the Bahamas to help build their local healthcare system. The Bahamas is in a vulnerable environment that is prone to natural disasters. Since Hurricane Dorian's tragic landfall on nearby Grand Bahamas and Abaco Island, Nassau has experienced an influx of individuals as survivors seek refuge. Since then, the Bahamas became more vulnerable due to the destruction of local infrastructure and homes. This created a lack of access to clean water, toilets, and other resources that increases the community's risk for diseases.

Our local team works to support the community and rebuild a more sustainable healthcare system. This trip will help improve the wellbeing of the community through treatment and education initiatives. Flexibility is a key component of success for this mission! Be prepared for a fluid situation that may require significant changes to the planned itinerary. It is our goal to provide aid in whatever manner is necessary to help the people and the medical and dental communities of the Bahamas.

In-country we will work to elevate vulnerable populations through shoulder-to-shoulder care with local partners, creating workforce density, and a cadre of future healthcare and public health leaders. Our medical mission teams also work toward Clean Water & Sanitation by supporting and strengthening the participation of local communities in improving their water quality, and installing water filtration systems that supply communities with clean drinking water and providing education on hydration and hygiene.

LODGING & TRANSPORTATION

Your team will be accommodated at a safe and comfortable hotel during the duration of your clinical trip. Transportation will be provided to and from clinic each day.

HIGHLIGHTS

Helping the people of the Bahamas to recover from this devastating tragedy is the highlight of this relief effort.

ITINERARY AT A GLANCE

Day 1	Arrival & Orientation
Day 2	Clinic
Day 3	Clinic
Day 4	Training Day
Day 5	Clinic
Day 6	Clinic
Day 7	Depart for Home

Day 1 – Dinner included

Today you will fly into the Bahamas, arrival no later than 5 PM, to meet the rest of your clinical team. Once all team members have arrived, you will attend orientation where your team leader will assign roles for the clinic, present clinic protocols, and provide an overview of the communities your team will serve over the next few days.

Days 2, 3 & 5 – Breakfast, lunch & dinner included

On clinic days, you and your team will work tirelessly during clinic sessions. Each morning, you will enjoy a delicious breakfast with your team before heading to your clinic site, where you will treat patients. Your clinical days will be long and hard, but the incredible work that you do will be well worth your efforts!

Day 4 - Breakfast, lunch & dinner included

Your team will assist in providing training for local healthcare providers to continue long-term, sustainable education efforts. Education is as important as medical and dental care for our patients. Each clinic includes basic health education according to the specialties and skills of the volunteers, as well as the needs of the local people. When communities become empowered to take health and wellness issues into their own hands, they become self-sufficient. Our partners provide learning opportunities for the local communities through classes and hands-on learning to sustain their well-being beyond our visit.

Day 6 – Breakfast, lunch & dinner included

On your last day of clinic, you and the rest of your team will join together in the evening for a final farewell dinner.

Day 7 - Breakfast

In the morning, you and your team will enjoy one final breakfast together before going your separate ways. Thank you for your service!
